

# SMA51 (35+) 8K Using the adapter plate

December 2021

All new SMA51 systems are able to run 300m and 30,5m/65m film rolls at an easy way. To run the 30,5m/65m cameras with the system you have to use the delivered adapter plate first and then the camera head. See PIC 1 and PIC 2 for more details and pay attention to the marks.

## PIC 1 → Portrait Heads

## PIC 2 → Landscape Heads
